MS AI SOURCING
GLOBAL HUMAN DATA FOR SMARTER AI

COMPANY PROFILE / OCTOBER 2026

Global human data. Grounded in experience.

Multilingual data collection, participant sourcing and vendor coordination for speech, language and vision AI.

MS AI Sourcing (FZE)

UAE Free Zone Establishment | SRTIP, Sharjah

Trade licence no. 20478 | Incorporated 21 October 2026

Founder and manager: Mahmoud Issa Suleiman

A new company. An experienced founder.

The company builds on more than seven years of the founder's experience in multilingual recruitment, AI data collection and vendor coordination. Previous programs include TTS recordings, wake words, voice commands and Arabic handwriting images.

What clients can expect

A scoped feasibility review, agreed contributor criteria, pilot alignment, production tracking and coordination of quality feedback and final delivery.

CAPABILITIES / LANGUAGES / DELIVERY

Capabilities built around the brief.

Speech and voice collection

ASR recordings, TTS speaker sourcing, wake words, voice commands and conversational speech.

Image and handwriting collection

Participant-led image collection and handwritten text datasets, organized to agreed instructions and output specifications.

Participant and vendor operations

Contributor screening and onboarding, local-team coordination, production tracking and client-feedback follow-up.

Language experience and market feasibility

Core previous delivery experience includes Arabic and regional dialects, Dutch and Brazilian Portuguese. Selected programs also covered Indonesian, French and Slovak. Other markets are assessed through partner sourcing.

Coverage is not a standing capacity commitment. Dialect, country of residence, demographics, equipment, volume and timeline are confirmed for each project.

A practical delivery sequence

01 Scope and feasibility

Define languages, contributor profiles, output formats, intended use and timelines.

02 Pilot and alignment

Review a small batch against agreed acceptance criteria before scaling.

03 Collection and coordination

Brief contributors, monitor progress and coordinate quality feedback.

04 Review and delivery

Organize files and metadata, resolve resubmissions and complete agreed delivery.

Selected delivery experience

The following cases describe the founder's work before the company was incorporated. Clients are anonymized for confidentiality.

Multilingual TTS collection

600 speakers | 765 reviewed hours | 98% reported final acceptance

Arabic, Brazilian Portuguese and Dutch. 200 speakers and approximately 255 hours per language. Recruitment took approximately three weeks; full delivery took six weeks. The founder coordinated recruitment, instructions, file tracking, client feedback and re-recordings.

Automotive wake words and commands

600 speakers | 240,000 recordings | ~97% reported acceptance

Saudi Arabic, Indonesian, Brazilian Portuguese and Dutch. 150 speakers per language, with 400 samples per person. The founder coordinated eligibility screening, sampling instructions, progress, client feedback and re-recordings. Delivery was completed in approximately one month.

Company onboarding and data handling

Company documents are available on request for procurement and due diligence. Project-specific arrangements define confidentiality, contributor consent, data use, licensing, acceptance and commercial terms before work begins.

Licensed activities include data collection; data classification and analysis; project management; radio programs and audio recordings production; and innovation and artificial intelligence research and consultancies.

Historical metrics are project-specific and do not guarantee future acceptance rates, timelines or current capacity. Sample sharing is subject to rights and confidentiality review.
